

F L A T

simon

Flat is a free-standing luminaire designed for accompaniment and lighting in work, study and reading stations. Its optics project comfortable light onto the work surface and can light one or two desks. A simple and stylish design that combines the essentials in a shape that's ideal for flexible spaces that seek an atmosphere of concentration.

WORK LIGHT

200

Flat projects all its light onto the work area uniformly, enhancing the work surface. They perform without overpowering the user, avoiding visual fatigue while creating the right climate to improve performance and well-being.

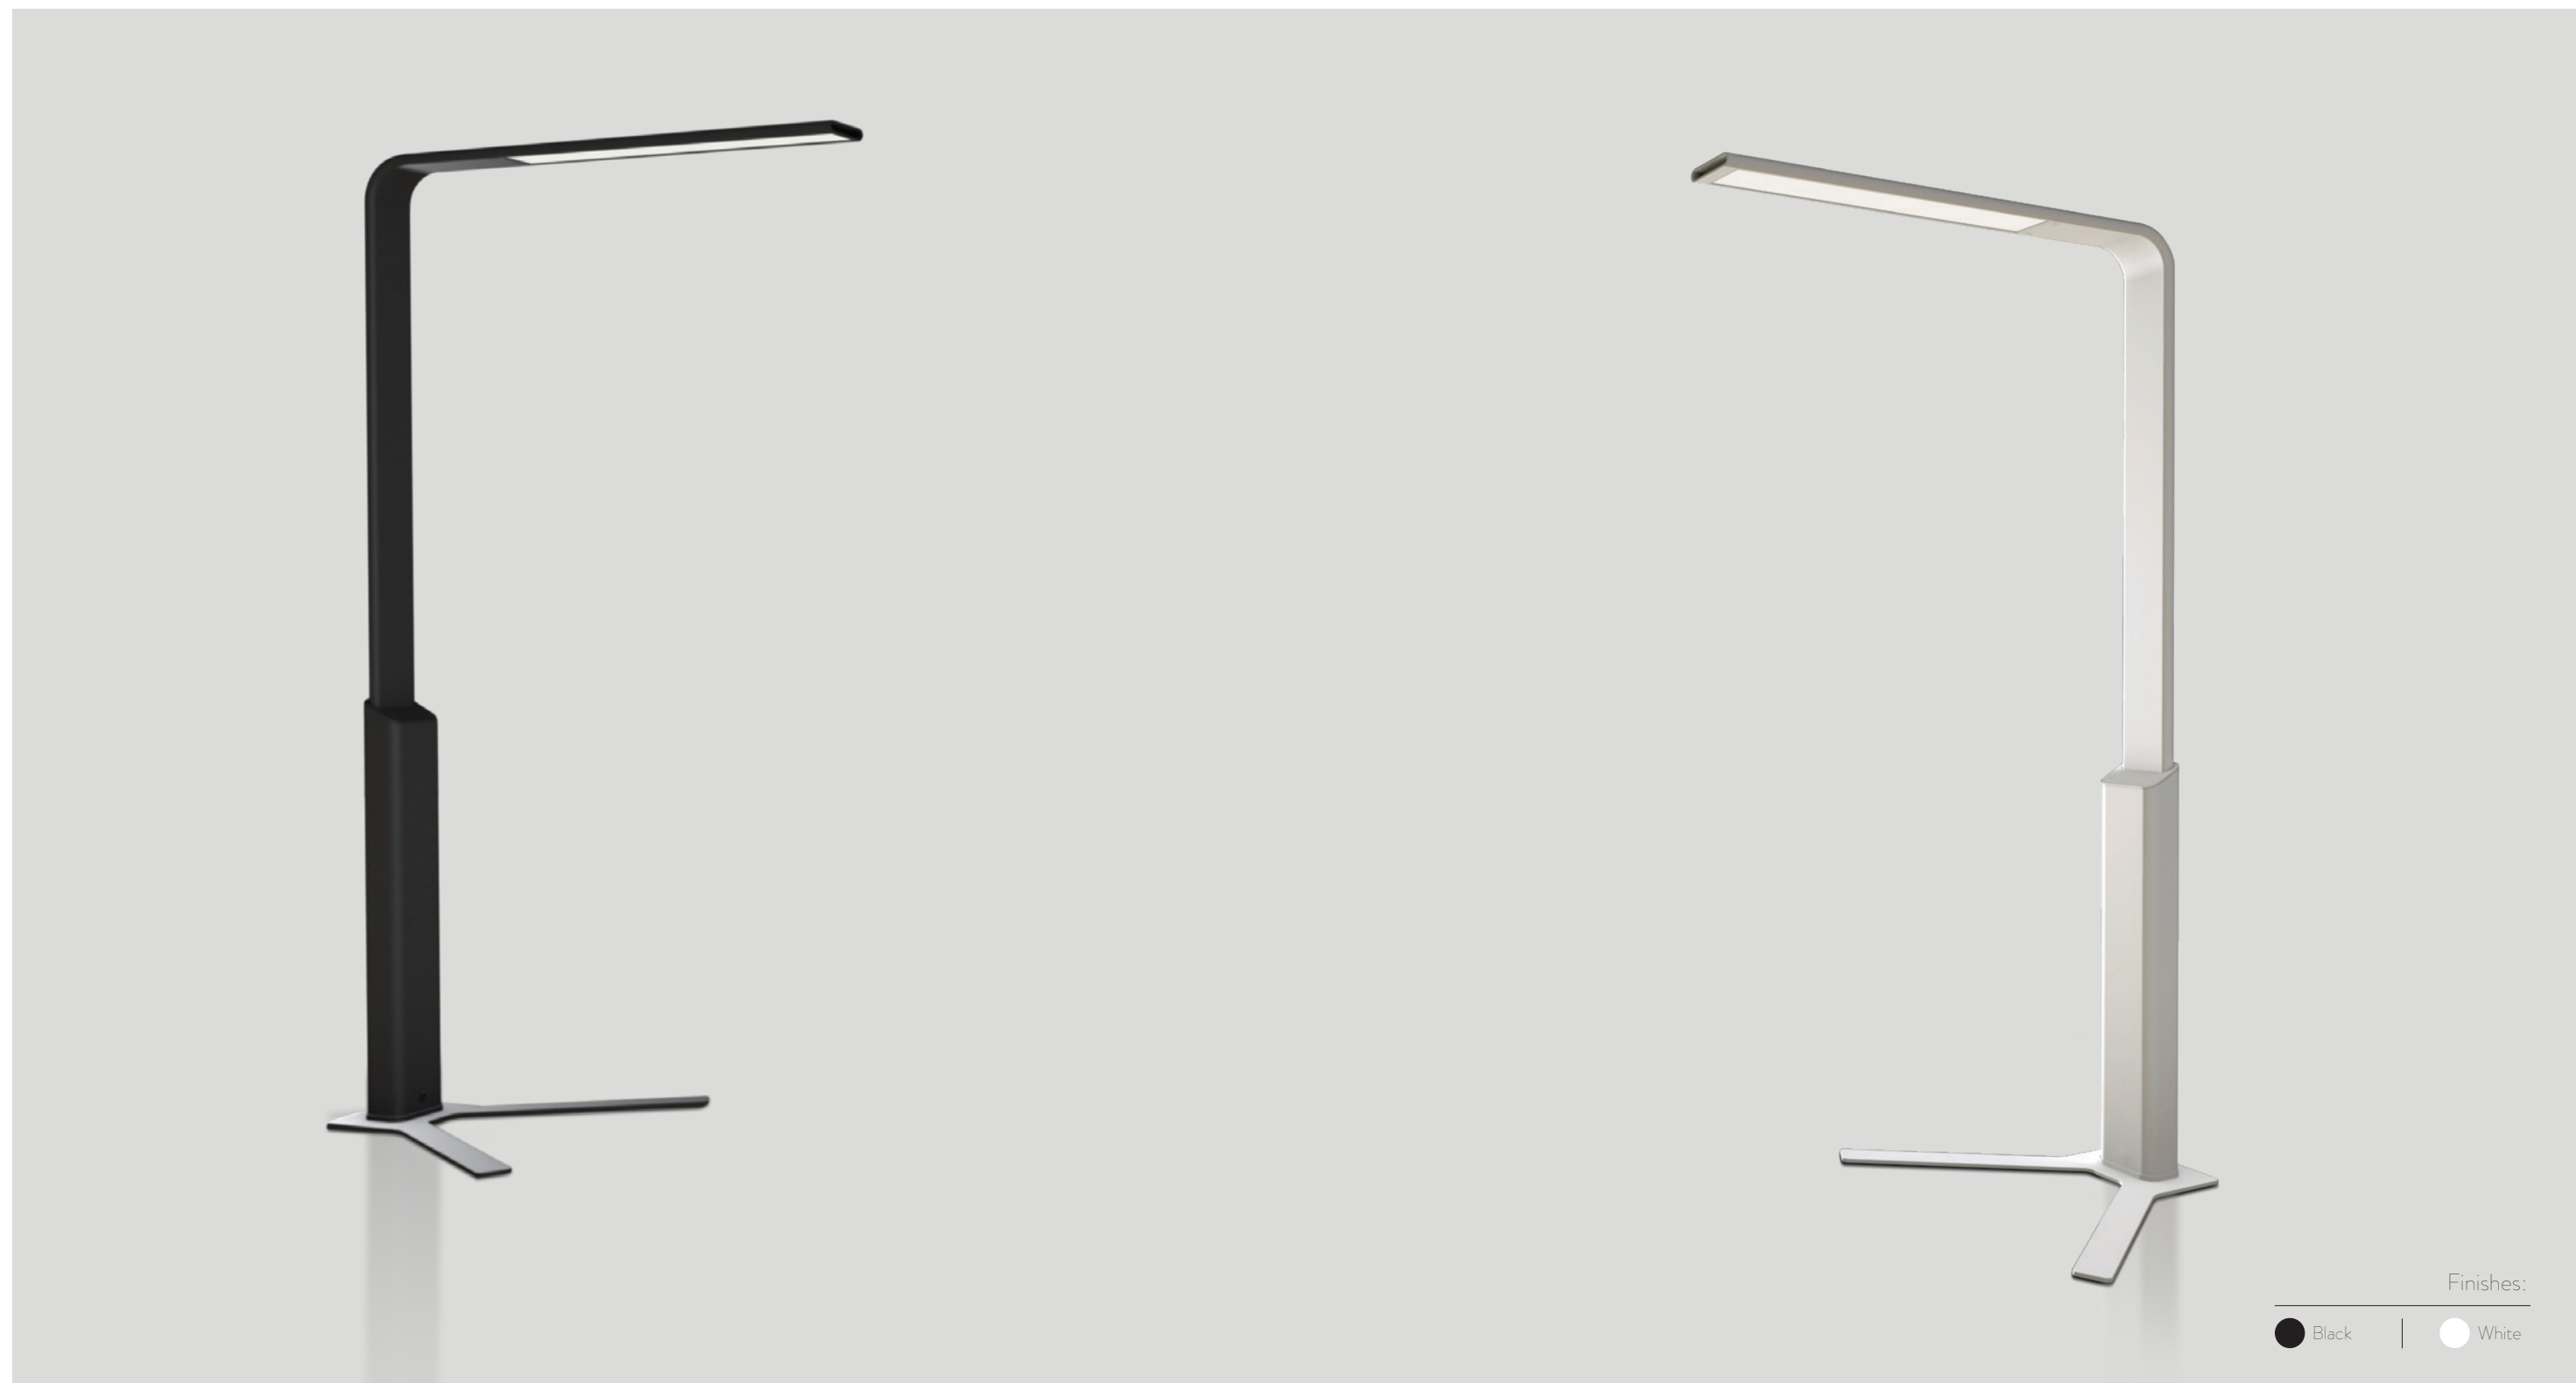

F L A T

CONTROL AND CUSTOMISE LIGHT

Flat incorporates a touch controller that allows simple light intensity regulation, making it easier for the user to customise and adapt the light according to the time of day and the task being performed.

PRODUCT COLLECTION

Flat is very versatile: its solid base lets it move to where it's needed, providing flexibility and facilitating the rearrangement of furniture, so it can be integrated into complex and demanding architectural spaces.

LIGHTING
COMFORTABLE

Its optics, with a high transmittance PMMA prismatic diffuser, have been specially designed to achieve total glare control and great comfort, to avoid visual fatigue.
