SURFACES

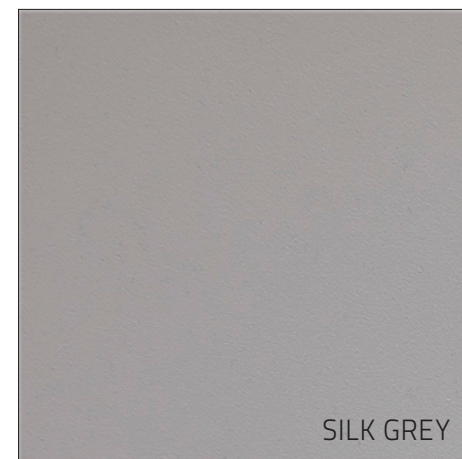

The harmonious implementation of an interior design concept also depends on the focused surface design of the luminaires. That's why we can supply our luminaires in the RAL colour of your choice on request. In addition, 24 high-quality surfaces are available. This is possible because we use various industrial and craft techniques in our production. We use a wide range of colours as well as diverse designs and structures. Or different materials such as woods, metals and concrete. In this way you benefit from enormous design possibilities.
