

Cool is a collection of luminaires where multiple micro-optics combine their light beams, obtaining maximum performance and visual comfort in a timeless design that allows maximum customisation.

COOL

MULTI-OPTICS

The combination of small, high-performance optics arranged in a matrix allows very high efficiency without compromising visual comfort. The result is the optimal balance between glare control and maximum light output.

COOL

GENERAL LIGHTING

Versions with extensive optics offer a high level of uniformity, thanks to a design that integrates a refractor and reflector with a high power LED.

COOL

LIGHTING ACCENT

Accent lighting versions designed to concentrate the maximum light intensity in the direction required. A lens and reflector concentrate the light emitted, optimise performance and create high contrast.
